

Detailed program

WEDNESDAY SEPTEMBER 2ND

8:00 h	Registration
9:00 h	Opening Ceremony: Marta Liras, João Carlos Lima, Olivier Soppera Salón de Actos. Chairperson: Marta Liras
9:15 h	Plenary Lecture (PL-1) Joao Sérgio Seixas de Melo <i>Photochemistry and photophysics of emissive and non-emissive organic molecules: from molecular design to functional applications</i>
10:00 h	Invited Lecture (IL-1) Sergio Navalón <i>Metal-Organic Frameworks for Photocatalytic Water Splitting: Structure-Activity Relationships</i>
10:30 h	Invited Lecture (IL-1) Vitor Brasiliense <i>Optical methodologies for analysing micro and nanoscale photoreactivity</i>
11:00 h	Coffee break & Posters` Session (I) Parallel Oral Communications Sessions Topic: Photoactive Materials. Salón de Actos. Chairperson: María González Béjar
11:30 h	OC-1 Roger Bresoli-Obach <i>Fastcomet: a colloidal memory architecture based on dielectrophoretic nanoparticle trapping</i>
11:45 h	OC-2 Rafael Contreras-Montoya <i>Light-triggered real-time visualization and sub-micrometric photopatterning reveal pathway complexity in photoreversible supramolecular hydrogel</i>
12:00 h	OC-3 Uwe Pischel <i>Photoswitching of donor-acceptor stenhouse adducts (dasa) in water</i>
12:15 h	OC-4 Raquel E. Galian <i>Engineering interfacial photophysics in perovskite nanocrystal hybrids</i>
12:30 h	OC-5 Jean-Pierre Malval <i>Multiplexed fluorescent polymeric microstructures sequentially encoded via two-photon click tetrazole-based chemistry</i>
12:45 h	OC-6 Arnau Marco <i>Light-control of polymer network formation using molecular photoswitches</i> Topic: Photocatalysis. Salón de Grados. Chairperson: Virginia Martínez Martínez
11:30 h	OC-7 Kaan Büyükkarber <i>Defect-engineered uio-66 photocatalysts via modulated synthesis for solar water splitting</i>
11:45 h	OC-8 Elena Jiménez <i>Tropospheric photochemistry of 2-halobutanes, CH₃CHXCH₂CH₃ (X= F, Cl, Br, and I): Potential alternatives to greenhouse gases?</i>
12:00 h	OC-9 Diana L. D. Lima <i>Spent coffee-based magnetic photosensitizers for solar-driven removal of antibiotics from water</i>
12:15 h	OC-10 Guillermo Orellana <i>Turning light into sensitivity: Leucomethylene blue-driven redox photocatalysis for food mycotoxin fluorescence assays</i>
12:30 h	OC-11 Adrián Pastor <i>CsPbBr₃@NiFe-layered double oxide heterojunction for improved CO₂ photothermal hydrogenation</i>
12:45 h	OC-12 Ana Athenea Tejedor <i>MOF-on-MOF composites with uio-66-based materials as photocatalysts toward solar-driven overall water splitting</i>

13:00 h	Lunch time
	Salón de Actos. Chairperson: Diego Sampedro
14:30 h	Invited Lecture (IL-3) Susana P. G. Costa <i>Bio-inspired photonic and photosynthetic systems: from structural mimicry to energy transfer</i>
15:00 h	Invited Lecture (IL-4) Christoph Lescop <i>Polymetallic cu(i) assemblies: luminescence and stimuli-sensitive behaviours</i>
	Parallel Oral Communications Sessions
	Topic: Computational Photochemistry. Salón de Actos. Chairperson: Diego Sampedro
15:30 h	OC-13 Valentín Díez-Cabanes <i>A theoretical insight the photophysics of Ti-based MOF catalysts</i>
15:45 h	OC-14 Luis Manuel Frutos <i>Mechano-Photochemistry: Steering Photoinduced Processes from Atomic Forces to Ball-Milling</i>
16:00 h	OC-15 Edgar Miranda-Sáenz <i>Mechanochemical modulation of uv-vis absorption spectra under ball-milling conditions</i>
16:15 h	OC-16 Stefano Scoditti <i>Computational study of acetonitrile photodissociation in terpyridine-based ruthenium(ii) complexes</i>
	Topic: Photobiology. Salón de Grados. Chairperson: Virginie Lhiaubet-Vallet
15:30 h	OC-17 Clara Cabrero-Tejero <i>Chemexcitation in melatonin-derived dioxetanes: potential implications for DNA damage</i>
15:45 h	OC-18 Jean Colombari Neto <i>Structure-programmable cationic dyes for multicolor live-cell imaging of specific organelles</i>
16:00 h	OC-19 Diego Cora <i>Energy transfer processes between chlorophylls in TX-100 micelles</i>
16:15 h	OC-20 Jordi Hernando <i>Photoswitchable anti-inflammatory agents</i>
16:30 h	Coffee break & Posters` Session (I)
	Salón de Actos. Chairperson: Raúl Pérez-Ruiz
17:30 h	Invited Lecture (IL-5) Sophie Sobanska <i>Photoreactivity of single particle with atmospheric interest</i>
18:00 h	Invited Lecture (IL-6) Leyre Marzo <i>Acyl azolium salts for the light-mediated acylation of alkyl halides: synthesis and photochemical studies</i>
18:30 h	GRUFO Best PhD Award 2024 Jaume R. Otaegui Rabanal
18:45 h	GRUFO Best PhD Award 2025 Javier Carmona García
20:00 h	Welcome Reception

THURSDAY SEPTEMBER 3RD

Salón de Actos. Chairperson: Joao Carlos Lima

9:00 h Plenary Lecture (PL-2)

Dirk Guldi

Materials for adaptive light management dynamic control over light capture, spectral down- and up-conversion, and energy storage

9:45 h Invited Lecture (IL-7)

Olga Crespo

Copper(I) tetracoordinated emitters

10:15 h Invited Lecture (IL-8)

Paulo Coelho

Photochromic naphthopyrans: From colour change to photopolymerization

10:45 h Coffee break & Posters` Session (II)

Parallel Oral Communications Sessions

Topic: Photoactive Materials. Salón de Actos. Chairperson: Jordi Hernando

11:15 h OC-21 María González-Bejar

Near-infrared activated upconversion nanohybrids for photochemical oxygenation and dna repair

11:30 h OC-22 Ruth Prieto-Montero

Hybrid nanoplatforms for targeted antimicrobial photodynamic therapy against gram-negative bacteria

11:45 h OC-23 Laura Rodríguez

Environment-sensitive pt(ii)-coumarin emitters and photosensitizers

12:00 h OC-24 Diego Sampedro

Sunscreens as functional materials for photochemical applications

12:15 h OC-25 Francisco Sánchez

Luminescent mofs featuring esipt and energy transfer for acid vapor detection

12:30 h OC-26 Joana S. Teixeira

All-in-one textile photo-supercapacitors enabled by hybrid quantum dots for self-powered wearables

Topic: Photophysics. Salón de Grados. Chairperson: Stefan Haacke

11:15 h OC-27 Sylvain Achelle

Photoluminescence of platinum(ii) complexes with diazine-based ligands

11:30 h OC-28 Sofía Blas-Gómez

Fluorescence lifetime-trackable quantum dot nanoconjugates for ezh2-targeted therapy in triple-negative breast cancer

11:45 h OC-29 Jens Fellner

Ultrafast photoisomerization dynamics in indole and indoline-based photoswitches

12:00 h OC-30 David García-Fresnadillo

On the photophysics of anthraquinone-based molecular nanographenes

12:15 h OC-31 Cristina Martín

Mechanistic insights into multistage, tunable emission in carbon dots

12:30 h OC-32 Virginia Martínez

Modulating excited-state dynamics in heavy-atom-free bodipys for efficient triplet formation and singlet oxygen generation

12:45 h Lunch time

Salón de Actos. Chairperson: Julien Boixel

14:15 h Invited Lecture (IL-9)

Elsa Cassette

Photophysics of size-controlled nanographenes from C78 to C132

14:45 h Invited Lecture (IL-10)

Luis Bañares

The importance of being a conical intersection in ultrafast photochemistry

Parallel Oral Communications Sessions

Topic: Spectroscopy. Salón de Actos. Chairperson: Julien Boixel

15:15 h OC-33 Mario de la Hoz Tomás

Spectroscopy and dynamics of a novel fluorinated tetraphenylethylene-based HOF

15:30 h OC-34 Miguel Gómez-Mendoza

Relationship between charge dynamics and reactivity in multifunctional organic and inorganic materials by transient absorption

15:45 h OC-35 Stella Hernández

Photophysics of tyrosine amino acid revisited

16:00 h OC-36 Ana Seijas

Cas9 aggregation implications on in vitro DNA cleavage

Topic: Photobiology. Salón de Grados. Chairperson: Santi Nonell

15:15 h OC-37 Stefan Haacke

Identifying the counter ions in archaerhodopsin-3 by ultrafast spectroscopy

15:30 h OC-38 Ayman Larek

Studies on photosensitizers conjugated to engineered targeting vectors as therapeutic agents against Candida species

15:45 h OC-39 Marco Marazzi

From binding to brightness: target dependent color emission reveals g-quadruplex vs b-dna selectivity

16:00 h OC-40 Carlos Montero-Galán

Excited-state reactivity of etheno adducts leads to pyrimidine dimers

16:15 h Coffee break & Posters` Session (II)

Salón de Actos. Chairperson: Marta Liras & Raúl Pérez-Ruiz

16:45 h GRUFO “Medalla Nicolás Monardes” Award Ceremony

17:15 h Invited Lecture (IL-11)

Inmaculada Andreu

A double-edged sword: the bright and dark sides of tyrosine kinase inhibitors upon sunlight exposure

17:45 h Invited Lecture (IL-12)

Elisabete Oliveira

Low-cost dye-doped polymeric materials for environmental and health applications

18:15 h GRUFO-RSEQ / GF-SPQ / SP2P-SCF Meetings

21:00 h Conference Gala Diner “Restaurante Convento de Mínimos”

FRIDAY SEPTEMBER 4TH

Salón de Actos. Chairperson: Olivier Soppera

9:00 h Plenary Lecture (PL-3)

Marina K. Kuinova

Mapping microscopic viscosity and temperature using molecular rotors

9:45 h Invited Lecture (IL-13)

Gilles Lemerrier

Access to and use of excited states of 1,10-phenanthroline derivatives

10:15 h Invited Lecture (IL-14)

Carla Casadevall

From molecular to polymersome-based systems for photocatalytic CO₂ reduction

10:45 h Coffee break

Parallel Oral Communications Sessions

Topic: Solar Fuels. Salón de Actos. Chairperson: Nuno Basílico

11:15 h OC-41 Hermenegildo G. Baldoví

Photo-assisted CO₂ conversion to methanol and CO with bimetallic copper and chromium catalyst derived from layered double hydroxide

11:30 h OC-42 Mariam Barawi

Conjugated polymers for next-generation photoelectrodes: from design to functionality

11:45 h OC-43 Vitor Fernandes de Almeida

Cluster strain engineering induces photocatalytic CO₂ methanation in titanium-organic frameworks

12:00 h OC-44 Ángel Humberto L. García

Photochemical optimization of molecular solar thermal (MOST) systems via photosensitization strategies

12:15 h OC-45 Joan García Ruiz

Utilization of derived from layered double hydroxide catalyst for CO₂ revalorization into value-added products in a continuous flow reactor

12:30 h OC-46 Soranyel González-Carrero

Organic semiconductor nanoparticles for efficient solar-to-hydrogen conversion

Topic: Miscellaneous. Salón de Grados. Chairperson: Iván Bravo

11:15 h OC-47 Pedro B. Coto

Charge and energy transfer processes in intramolecular singlet fission

11:30 h OC-48 Alesandro Ciccone

Light-induced post-synthetic remodeling of CsPbBr₃ nanocrystals

11:45 h OC-49 Laura Francés Soriano

Food waste-derived carbon dots for metal ion sensing applications

12:00 h OC-50 Joana Galhano

Sustainable fluorometric probes for environmental issues

12:15 h OC-51 Susana Encinas

Photoinduced fluorescent lysine targeting using structurally tailored quinoxaline N-oxides as latent electrophile

12:30 h OC-52 Simon Ali Rincon Celis

Electron transfer dynamics of an Fe(II)-NHC complex with nanosecond-lived excited states

12:45 h Lunch time

Salón de Actos. Chairperson: Nathan D. McClenaghan

14:15 h Invited Lecture (IL-15)

Rute A. S. Ferreira

Luminescent solar concentrators: from sustainable energy harvesting to smart photonic systems

14:45 h Invited Lecture (IL-16)

Santi Nonell

Push-pull aza-bodipys for type-i photodynamic therapy and theranostic imaging

15:15 h Invited Lecture (IL-17)

Ángel Orte

Multiplexed imaging of kinase activity using long-lifetime triangulenium-based peptide biosensors

15:45 h Closing Session
